

Right-size your EDI, Managed or Self-Managed, We've Got You Covered

Entrust+ is a full-service, end-to-end EDI solution that offers your growing business flexibility, control, and affordability.

At Encompass Solutions, we know every manufacturing business needs EDI, but not all require the same management approach. Some teams prefer full-service solutions, while others want more control, flexibility, and affordability to handle EDI themselves. EntrustPlus provides that option.

The Entrust+ Advantage

- > Ideal for SaaS platforms, marketplaces, and custom applications.
- > Cost-effective and scalable, designed for small to medium-sized businesses.
- > Easy to deploy, quick to get started, and capable of supporting growth without issues.

Without the right-fit EDI, you risk:

- > Overpaying for services you don't fully utilize
- > Hindering growth with a rigid system
- > Losing the control and flexibility your development teams desire

Entrust+ is suited for:

- ✓ SaaS platforms and marketplaces
- ✓ Internal IT teams seeking seamless, end-to-end EDI integration
- ✓ Businesses that do not require full-service VAN support

Our traditional managed EDI services are still available for teams who prefer our premium partnerships.
